Howard,

That is correct, no LISST data was recorded for 11/30 on board the Tieton.

AECOM representative noted that they will (most likely) not account for that piece of data for yesterday's sampling at Transect 6 (even though there will be no attempts to record yesterday's LISST data).

Jonni

Subject: RE: Surface Water Sampling
Jonni,
Did they record any of the LISST data (particle size and solids content) on the field data collection form during the sampling on the LISST data for that surface water sample collected on the Tieton yesterday completely lost?
Thanks,

Subject: Surface Water Sampling
Good morning,

The R/V Tieton has just launched from SIL, and is en route to finish the last surface water sampling transect () near RM 7. Gravity confirmed this morning that LISST data on board the Tieton for yesterday's activities (11/30) did not record. They have brought a new instrument for today and have confirmed the instrument is working properly.

Thanks,

Jonni
